# mInventory HotFix Release Notes

## 1. What's New

Reference No	Description
SSS-25833	<b>iOS - Enabled Storage Location Selection</b> Introduced storage location selection functionality in Inventory Management Picking and Goods Issue - Outbound Delivery modules, giving users greater control over inventory placement and movement while enhancing operational efficiency.
SSS-26531	<b>iOS,UI5, ABAP - Improved Stock Handling with Editable UoM Field</b> Added UoM editing capabilities across multiple modules including Inventory Management, Warehouse Management Cycle Count, Transfer Posting, Stock Transfer, Goods Receiving, and Blind Count. This flexibility allows users to adjust measurements and handle stock in various units, significantly improving inventory accuracy.
SSS-25685	<b>iOS - Software Update for Socket Scanner</b> Updated the Software Development Kit for the Socket Scanner, which improves its functionality, ensuring better compatibility and features for scanning tasks within the system.
SSS-26627	<b>ABAP - Added Collections to Develop Custom Module</b> Added two new collections in the Backend System to support the development of a custom module for Pick and Dispatch, enabling the implementation of BADI changes and ensuring seamless integration of custom logic with existing workflows.
SSS-24382	<b>ABAP - Enhanced Return Process for Quality Issues</b> Implemented a streamlined return process that automatically creates return deliveries and posts goods receipts against sales orders when customers return items due to quality concerns. This enhances quality issue tracking and improves customer satisfaction.

## 2. What's Fixed

Reference No	Description
SSS-26193	<b>iOS</b> - In the Transfer Posting - Others module, the success message after a transaction was misaligned.
SSS-26091	<b>iOS</b> - In the Goods Receiving - Outbound Delivery, Inventory Management, and Warehouse Management modules, increasing the font size to the maximum caused display issues, making text difficult to read in landscape mode.
SSS-26390	<b>ABAP</b> - In the Goods Receiving and Goods Issue modules, Material Document cancellation transactions were not recorded in the Material Transaction Report.
SSS-26284	<b>iOS</b> - In the Inventory Cycle Counting module, attachments were duplicated in the subsequent postings.
