mInventory HotFix Release Notes

1. What's New

Reference No	Description
SSS-24376, SSS-26043	**iOS, ABAP -Subcontracting Order (541) Enabled for MRO Processes** The Goods Issue module now supports Subcontracting Order type 541, allowing goods to be issued to subcontractors for maintenance, repair, and overhaul (MRO). This ensures accurate inventory tracking and supports complex maintenance workflows.
SSS-25597	**SAP Functional - Image Uploads Added to Stock Overview** Users can now capture and upload images during stock verification, directly linking them to the material master. This improves material identification, enhances documentation, and supports more reliable inventory management.
SSS-26019	**iOS - Direct Navigation to Material Document Display After Posting** After completing a posting in Goods Receiving, users can immediately navigate to the Material Document Display module through a direct in-app link. This reduces navigation time and simplifies document verification.
SSS-26391	**iOS - Certificate Field with Attachment Validation for QM Materials** A new Certificate dropdown (Yes/No) is now available for Quality Managed (QM) materials during goods receipt. Selecting "Yes" makes attachment upload mandatory before posting, ensuring quality compliance and proper documentation.
SSS-26956	**Android - Refresh Option Disabled During Sync for Better Data Integrity** The manual refresh option is now disabled during offline sync, preventing interruptions and ensuring all data is accurately and smoothly synchronized.

2. Document Revision History

S. No.	Document Version	Date Created	Change History
1.	1.0	30 April 2025	MIM 2503
