Device Storage and Memory Requirements	All devices must have a minimum of 32GB storage and 4GB RAM for online data processing. 32GB storage and 4GB RAM are recommended to support higher volume data, including documents and offline store capabilities. Performance varies based on the amount of data and installed RAM.

mWorkOrder Release Notes

What's New

Improvements

Improved Form Organization

Users can now view distinct fields within a section in Forms, neatly separated by a horizontal line. This enhances visibility, reduces confusion, and improves the overall user experience.

This feature supports the *SAP Functional* platform.

Improved Offline Availability for Pinned Work Orders (ABAP)

Users can now access pinned work orders offline, even if they're outside the usual sync window.

This ensures pinned work orders are always available offline, improving user experience,

productivity, and consistency across modes.

This feature supports the **ABAP** platform.
